

## **IMPORTANT INFORMATION TO READ and RETURN**

## Installation Requirements for a Whitley H155 HEPA Hypoxystation

Thank you for choosing one of our products for your laboratory. To enable our engineers to perform an efficient, trouble-free installation please study, complete, and email this form to us at <a href="mailto:service@dwscientific.co.uk">service@dwscientific.co.uk</a>. Should you have any questions, please do not hesitate to contact us, as we are here to help. When we have received the completed form, our Service Department will contact you to arrange a mutually convenient installation date.

### The following information represents the ideal requirement. Please contact us IMMEDIATELY if your intended location does not match this specification.

#### **Access Requirements**

Please note that this product is wider than a standard door so please ensure that you consider access carefully.

#### **Space Requirements**

The weight of the equipment is 350kg. This workstation comes complete with a bespoke trolley. Please ensure that sufficient floor space is allocated. If you wish to locate the workstation on a bench, please contact us to discuss the implications.

#### **External Dimensions\***

Width (mm)	Depth (mm)	Height (mm)	Height Including Trolley (mm)
2875	1056	1063	1911

#### \* Please Note:

If the **Refrigeration System** is fitted, please allow a clearance of 770mm behind the workstation. If the **Heat Removal System** Is fitted, please allow a clearance of 600mm behind the workstation. Some of this clearance is necessary for air circulation.

The H155 will be shipped in two parts (left hand workstation and right-hand workstation) to facilitate delivery to your laboratory (negotiating lifts, corridors, doorways, etc). Each half of the workstation measures 1437.5mm wide x 1056mm deep x 1063mm high.

#### **Gas Requirements**

The incoming gas supplies must be terminated near the right-hand side of the main chamber and fitted with leak-proof taps and pressure gauges.

The gas lines to which the equipment is attached are the responsibility of the user and should be constructed, tested and maintained to the standards specified within the British Compressed Gasses Association (BCGA) Code of Practice CP4 (or international equivalent). Gas lines previously used for flammable gases must be purged prior to re-use.

Regulators should be fitted in accordance with the information contained in the table below and the various pressures strictly adhered to.

Gas Type	Connection Details	Cylinder Regulator Required	Regulator Outlet Range	Flow Rate
CO2	<sup>1</sup> / <sub>4</sub> BSP male fitting or connection for 6mm Polyurethane Tubing CO <sub>2</sub> Regulator – Two Stage – order Code <b>A01747</b>	Two Stage	4-6 bar (60-90 psi)	Minimum 10 litres per minute (Dynamic)

In the UK, delivery and installation are free of charge (unless otherwise agreed). If our engineers are unable to install the unit and a return journey is necessary, **a charge may be made**. Export customers should please refer to their local distributor.

It is essential that this form is completed and returned, to avoid delay to your installation.

# THANK YOU FOR THINKING WHITLEY
